

CULLET CRUSHERS

7,5 - 15 - 25 - 35 TPH

Hammer impact crushers

Engineering since 1984

Over 1200 machines for glass industry sold to 60+ countries

INTRODUCTION

Vidromecanica has developed special crushers to meet the requirements of glass industry. We manufacture in-house several models of glass crushers for every capacity.

The cullet crusher was designed for use in the glass industry and have been built in a robust and safe way for this particular aggressive application.

The size reduction of the glass is an important part of cullet treatment. Vidromecanica crushers are easy to maintain and have wear resistant interior parts to maximize operational life. The materials selected for zones subject to wear are chosen so that the abrasion has little effect on the glass quality. Vidromecanica has developed special crushers to meet the requirements of glass industry.

All parts contacting the cullet are made of high quality cast electric steel, the abrasion resistance. There is such a low abrasion that even in case of highly sensitive glass, lead crystal there are no negative impacts on the glass quality.

Our reference list show you that we have sold our crushers to many renowned worldwide glass factories.

*Increase cullet usage
and save up to 30 %
of the energy used in the
melting process*

ENGINEERING, DESIGN, MANUFACTURING AND INSTALLATION

*Innovation and Technology
since 1984*

*Our vision is a world inspired by glass,
empowered by Vidromecanica as a leading
manufacturer of innovative equipment
for the glass industry.*
